US Citizen - Barcelona, Spain

Highly skilled front-end developer proven by the implementation of multiple web solutions with 1,000s of active daily users for large corporate companies. His work ethic, unique skillset, and proven track record of exceeding client exceptions has made him a desired project team member by many of his peers and managers.

## WORK EXPERIENCE

### Senior Technical Consultant
Hitachi Consulting

June 2016 - June 2019                    Houston, TX

Worked on a variety of projects for large corporate companies, using technology to help achieve business goals.

- Developed pixel perfect mobile responsive web pages based on client designs by utilizing CSS3 and a variety of JavaScript Libraries/Frameworks depending on the project.
- Designed web pages using Adobe XD based on clients' branding guidelines and UI/UX best practices.
- Led client meetings and demos as the main front-end developer on the project.
- Managed several projects as the Project Lead, which included submitting estimations, SOW, project calendars, and managing client relationship.
- Adapted and learned new technologies to prepare for a variety of project roles.

### Process Engineer Intern
Ellwood Group Inc.

June 2015 - August 2015                    Navasota, TX

A paid summer internship where I managed and developed multiple corrective projects.

- Develop VBA program to organize and distribute quality alerts to production.
- Interview company management to discuss shortfalls and plan corrective projects.

### Shift Manager
Starbucks

December 2013 - December 2015          College Station, TX

Full time job in college, worked 32 hours/week while managing a full engineering course load.

## EDUCATION

### Bachelors in Industrial Engineering
### Minor in Mathematics
Texas A&M University

December 2015                    College Station, TX
